Mr. Brian Mossman Boeing Realty Corporation 4900 Conant, Building 1 Long Beach, California 90808

Subject: Soil Vapor Extraction, Building 1/36 Area

Quarterly Report Number 16, Fourth Quarter 2005 Former C-6 Facility, Los Angeles, California

Dear Mr. Mossman:

Haley & Aldrich, Inc. (Haley & Aldrich) has prepared this letter report to summarize the fourth quarter 2005 soil vapor extraction system (SVE) activities at the Former C-6 Facility, Building 1/36 Area in Los Angeles, California (Site). The location of the Site is shown on Figure 1; the SVE pilot test treatment area on Figure 2.

This letter report has been prepared in response to the Los Angeles Regional Water Quality Control Board's (LARWQCB) reporting requirements and is being submitted in lieu of a full quarterly report because the SVE system was not operated during the fourth quarter of 2005. It had been previously operated between 2 July 2001 and 30 September 2004, when the system was shut down and disassembled to facilitate Site redevelopment and new building construction. SVE system operational data through 30 September 2004 has been presented in previous quarterly reports submitted to the LARWQCB (Haley & Aldrich, 2004). Activities performed during the fourth quarter 2005 included the completing construction of underground SVE piping to the existing SVE wells and mobilization of the SVE remediation equipment (blower, knock out tanks, GAC vessels, etc) to the site.

Quarterly data reports will resume after completion of SVE system installation and after SVE operations recommence in early 2006.

12 NO. C 64476

Please do not hesitate to call if you have any questions or comments.

Sincerely yours,

Senior Engineer
